FOREST IN STOCK FABRICS

OUR STOCK ROLLER SHADE FABRIC PROGRAM is designed to offer you design trends in each of three categories - screens, light filtering, and blackout. We believe you will find a color and performance factor to meet your needs within this offering. Fabrics were also selected to work together in a single color palette when you need to pair a screen or light filtering fabric with a blackout. This is helpful when using a double roller shade system or when a single room has a variety of shading requirements.

All fabrics are suitable for any of our roller shade systems.

Fabric images are a close representation, but for best results please email sales@forestdh.com to order a swatch card.

SCREENS

With two openness factors, 3% and 5%, our screen collection offers the ideal solution for all needs in terms of heat and/or light management. Screen fabrics are made of high-quality polyester yarns for strength and durability.

LIGHT FILTERING

Our light filtering collection offers transparent fabric that filters the light in a delicate way. The inspired fabric is available in a range of timeless colors.

Flame retardant - 94 in. wide
